

GRAD592 - Semester Assignment and Grading

For students taking the 2009 GRAD592 Graduate Water Resources Seminar, the course will be graded pass/fail. To receive a passing grade students need to send an email to Reagan Waskom at Reagan.waskom@colostate.edu after 8 of the 12 lectures with a short write up of the key points of the lecture, any disagreement or opinions you might have about the lecture and any questions that you did not get answered. You may choose any of the 8 lectures to write up, but send me your write up within 2 weeks of the lecture to get credit. There is not word limit, but about 200- 250 words should be adequate as a guideline. The only other requirement is that you attend the final class on Dec 7 as we plan to let the students summarize the semester in a discussion format. Speaker powerpoints and handouts will be posted at www.cwi.colostate.edu/grad592.asp for your reference. Hope you will ask the speakers questions and enjoy the seminar. Contact Reagan if you have any questions.
